

Industrial Emissions Control Technology VII and Regulatory Workshop

August 3-6, 2009
Holiday Inn By The Bay
Portland, Maine

The Conference where Industrial Boiler Owners & Operators come together to:

- Review emission regulations and the applicability of emission controls and alternatives for industrial boilers;
- Learn what technology advancements might be possible or required to improve energy efficiency, productivity & system performance;
- Meet with other Industrial Energy & Environmental Managers to discuss the latest emission regulations, their control problems & potential solutions;
- Understand the capabilities & limitations of current applicable technologies for industrial facilities and;
- Network with other boiler owners & operators to find the best, and least cost path to compliance.

Who Should Attend:
Plant Owners & Operators
Equipment Manufacturers
Architects & Engineers
Service Suppliers
State & Federal Regulators

The seventh CIBO Industrial Emissions Control Technology Conference focusing on the operations, management, performance, technology developments & regulations impacting Industrial Boilers for NO_x, SO₂, PM, & Air Toxics – what you need for Boiler and Area Source MACT, NO_x SIP, CAIR Plus & Title V

If you own a boiler or Industrial, Commercial or Institutional (ICI) energy source greater than Three Million Btu/hr Heat Input, you probably know or should know these terms: 112j Part 1 and Part 2, Boiler MACT, Area Source MACT, CAIR Plus or Industrial CAIR, State SIPs, control technology, performance standards, annual tune-ups, SSM, CISWI Fuel/Waste definition, Green House Gases, NSPS, RPS, energy efficiency, NSR and a host of others. If you do not know what these are or how they impact you today, as compared to even six months ago, you should find a way to Portland, ME, this August. On January 20, 2009, "Change" arrived and we are in the middle of it.

There has probably never been a time when more was happening to impact the ICI Sectors than at this present time. No ICI boiler is exempt – no matter how small, no matter where you are located. All emissions are being considered -- NO_x, SO₂, Particulate, CO, HCl, Mercury and CO₂. That will impact the way we run our boilers and how we will be able to meet the environmental needs of the country and help states comply with National Ambient Air Quality Standards and other Air regulations.

Understanding the current situation; the potential rules and regulations and their timing; the applicability, operation capabilities, and limitations of control technologies; and, the alternatives compliance possibilities is imperative especially in this time of economic uncertainty. This conference will focus on ICI boilers' energy generation systems and include owners', manufacturers' and suppliers' and NGO and regulators' only forums to help generate valuable discussion between the groups and a truly beneficial conference for everyone. The conference will be arranged in panels with limited numbers of highly qualified speakers and ample time for participant and case study discussion.

The current environmental climate is pushing the demand for maximum performance, emissions reduction and efficiency. How do you get these out of existing systems? How does the industrial or institutional system continue to survive and take advantage of alternative fuels today and tomorrow? What are the control alternatives and possibilities with existing industrial units? What does it take to keep these units operating safely, at peak performance and meet the new requirements?

Industrial Emissions Control
Technology VII Conference and
Regulatory Workshop,
August 3-6, 2009

- Send additional information & details
- Please send me information on Exhibit Booths

Hotel Information

The Industrial Emissions Control Technology VII Conference and Regulatory Workshop will be held at the Holiday Inn By The Bay, Portland, Maine. Please call the hotel direct at **1-207-775-2311** or **1-800-345-5050**. Guests must mention "CIBO" when calling to make their room reservation. A block of rooms has been set-aside at the special rate of **\$159.00** single/double per night and **\$169.00** for a king size per night or **\$179.00** for an Executive style king/double room. **The cutoff date for reserving rooms at this rate is July 1, 2009.** Late reservations will be accepted on a space-available basis. Be sure to mention "CIBO" when making your reservations. If you have any problems reserving a room, please contact CIBO.
