

News from KC Cottrell Inc.

KC Cottrell Inc. selected to supply new Electrostatic Precipitator for Kochi Refinery.

KC Cottrell has been selected to design and supply an Electrostatic Precipitator for the new petroleum refinery being constructed in Kochi, India. The new ESP will provide for enhanced control of particulate emissions from the Fluid Cat Cracker. Engineering has started at KC Cottrell's offices, with delivery scheduled for the second and third quarter of 2014.

Bob Mastropietro receives International Fellow Award from ISESP

At the ICESP XIII Conference in Bangalore, India, Bob Mastropietro, Vice President of Technology for KC Cottrell Inc., received the International Fellow Award from the ISESP, recognizing Bob's outstanding expertise in the field of Electrostatic precipitation. Bob was also elected to the Board of Directors of the ICESP. Congratulations to Bob.

Come Visit KC Cottrell Inc. at the Chem Show in New York

KC Cottrell Inc. will be attending and exhibiting at the Chem Show in New York next week. Come visit us at Booth 836. The Chem Show will be held on December 10-12 at the Jacob Javitz Convention Center in midtown Manhattan.

KC Cottrell remains a Dominant Global Player in Air Pollution Control

KC Cottrell continues to expand its dominant position as global supplier in the APC business. Within the past year, KC Cottrell has received contracts for 7200 MW of ESP on coal-fired boilers, including those in back of the world's largest CFB boiler, rated at 1000 MW. KC Cottrell has also received an important contract in the steel industry, where it will supply four large Pulse Jet Fabric Filters using long bag (9.4 meter) technology.
