

COMBINED VIRTUAL BOILER OPERATIONS,  
MAINTENANCE AND  
PERFORMANCE/INDUSTRIAL EMISSIONS  
CONTROL TECHNOLOGY CONFERENCE

“A Changing Energy Environment: Taking a Deeper Dive – Looking at a  
Proposed De-carbonized Future.”

TUESDAY, July 13, 2021

10:00 - NOON Informal "Owners' Only" Shirt Sleeves Session

1. What is your company doing on sustainability efforts with GHG reporting and a net “zero” carbon environment impact on operations?
2. What EJ issues are you seeing?
3. Do you see any concerns with SEC and ESG reporting?
4. What types of alternative “green” energy are you looking at?
5. What role does boiler/process heater tune-ups play in lowering GHG emissions?
6. How will the current Administration’s energy policy impact the future operation of industrial power plant operations?
7. What keeps you up at night?
8. Other issues you think membership should be aware of?
9. Any questions for suppliers?
